

## Nova 71 Stereo Headphones

Your Optimus Nova 71 Stereo Headphones deliver full-frequency sound in a lightweight design. They are designed for use with the latest digital audio equipment, compact disc players, and digital compact cassette (DCC) decks, and are even light enough to use with portable CD players and personal stereos. The headband (with adjusting inner strap) provides a comfortable fit for any head size or shape.

## FEATURES

**Lightweight Construction** — comfortably delivers the full range of dynamic sound you expect from digital sound sources.

**Swivel Foam-Filled Soft Crinkled Earpads** — provide a comfortable, frequency-sensitive listening experience.

**High Energy, Ferrite Magnet, Mylar-Cone Speakers** — deliver high-quality stereo sound.

## OPERATION

**Caution:** Turn down the volume on your sound source before plugging in the headphones.

1. Insert the headphones' plug into a  $\frac{1}{8}$ -inch stereo headphone jack on your equipment.
2. Adjust the headphones for a comfortable fit.
3. Adjust the source's volume to a comfortable level.

## Listening Safely

To protect your hearing, do not listen at extremely high volume levels. Extended, high-volume listening can lead to permanent hearing loss.

Your ears adapt to higher volume levels over time, so even a volume level that does not cause discomfort might still damage your hearing.

## Traffic Safety

Do not wear headphones while operating a motor vehicle or riding a bicycle. This can create a traffic hazard and could be illegal in some areas.

Even though some headphones let you hear some outside sounds when listening at normal volume levels, they still can present a traffic hazard.

## OPTIONAL ACCESSORIES

**Stereo Y-Adapter (Cat. No. 42-2463)** — lets you connect two sets of  $\frac{1}{8}$ -inch stereo headphones to one  $\frac{1}{8}$ -inch stereo headphone jack.
